Creative full stack web developer who loves to figure out how things work. I thrive in a collaborative environment and approach everything with empathy, and compassion. Looking forward to joining a team of creative developers.

SKILLS

Languages: HTML | CSS/SCSS | JavaScript | SQL | JSX | EJS
Frameworks: Vue | Node | React | Express | Bootstrap
Database: MongoDB | Mongoose | PostgreSQL | Sequelize
Design: Flexbox | CSS Grid | Material-UI | Photoshop | Illustrator | Sketch | Figma
Extras: Netlify | Git | GitHub | Vuex | AJAX | JSON | jQuery | RESTful APIs | HTTP

EXPERIENCE

Indigo Slate — *Front End Developer*

Jul 2018 - Present | Seattle, WA

- I collaborate with diverse teams made up of PMs, copy writers, videographers & graphic designers
- Primarily leveraging Vue, Vuex, Nuxt, gsap, anime.js, scss, flexbox & css grid
- Working both in tandem with other devs or independently, depending on the project
- Working closely with both graphic and motion designers throughout the life cycle of the projects, to ensure their vision is executed properly

Inspirable LLC — *Web Designer / Development*

Aug 2012 - Jan 2018 | Seattle, WA

- Primary designer & developer for most of my time with Inspirable
- We utilized Prestashop and Wordpress for the majority of our clients
- I communicated daily with clients via phone, email, and meetings
- I collaborated with other companies and in some cases other developers

Hypr Inc. — *Web Design | Graphic Design | Web Development*

Jan 2012 - Aug 2012 | Seattle, WA

- I worked on various tasks from icon design, page layout, brochure design and web design
- I was flexible, helping wherever I was needed, which made me a valuable employee

EDUCATION

General Assembly — *Web Development Immersive Course*

Jan 2018 - April 2018 | Seattle, WA

Focused on programming fundamentals, data-structures, popular web technologies, database development, CRUD operations, RESTful routing, OOP, TDD, Git and version control. Practiced pair-programming, agile development, wireframing, rapid prototyping, and peer code reviews.

The Art Institute of Seattle — *Web Design & Interactive Media*

Sept 2008 - Dec 2011 | Seattle, WA

PROJECTS

Triview — *App for tracking real estate investment portfolios*

Vue | Vuex | SCSS

- I was responsible for building out components to be extendable to all variations in comps
- Worked closely with one other front end developer and a team of back end developers
- Constructed to be very modular so that each card could easily be removed or swapped

The Pursuit Of... (see portfolio) — *Digital version walkthrough of a book*

Vue **|** Nuxt **|** GSAP **|** Lottie **|** SCSS

- Full page vertical snap scroll with animated transitions
- Client wanted each chapter to be its own page but feel like a fluid experience so I built it in a way that you can scroll to the next or previous route without feeling like you have gone to a new page

Self-Guided Demo — *Guided scenarios using a simulated app interface*

Vue **|** GSAP **|** SCSS

- Guides the user through the scenario using a timeline that stops for user interactions including clicks and typing
- Utilized both video and animated svgs to accomplish the recreated interface both in the desktop and phone experience
- Built to be utilized as a selling tool that gives the potential customer the feel of using the app and its ease of use
